Page 512: ... True power is the divine self-awareness: be aware of who one is, namely a spiritual soul, an eternal part of the Almighty God. The souls (we) and the origin (God) are one and quantitatively qualitatively different. The parts and the whole are always connected, and this unifying connection is what love is originally.

The people now live in an age where this love once again open to all souls will be offered. **The return to the higher worlds, and also in the eternal, spiritual world is open again.** Sufficient experiences are made, and the highest lesson is: the loved ones. Love removes all gaps on them is the goal of perfection, and it is what the dark forces in the final search.

Page 513: ... **"The back door is open to God. The Herabgestiegenen be recalled**, the people invited and the dark nature to reverse.

The offer applies to all! To be sustainable, the decision that every human being now, every man for himself, must take.

The differences between the people of the herabgekommenen, come up and terrestrial lines are now practically abolished, because in truth there are differences between these souls are not

Now it's up to them by God's grace the open gate to pass through. Of course they are in line with their development in different areas of light - **and into the light but they can if they want only. That is the test of one's own truthfulness.**

All people, even the old and the world from the darkness incarnate, have the lowest point of the historical cycle, the opportunity to see that something in their mentality is not right. **For thousands of years already hear the warnings and announcements. Nobody can say he or she would not know.** No dark power and manipulation can not gloss over this truth. **Anyone who wants to can and will find. So there is no excuse not to go into the light.** Accordingly sustainably are also the consequences in the current exam's. The divine end time prophecies are not talking for no reason with a radikalten ("deep rooted") language.

The darkness, however, denied this mighty truth and pursuing their own half-truths with which they justify their actions. To emerge from the darkness, the dark powers learn to abandon their mentality, and their final luziferischen rebellion desist. This justified the rebellious mentality and related activities is the biggest enemy of this redemption. In a simple formulation of psychological states this mentality:

"I hear that there is light there and see it maybe, but the shadow is just as good and necessary. That is why I continue to stay in the darkness, in my own little world. "... ..
